ATTN : Logistics Office
Chief, Supply Division
Office of Communications

Disposal of Surplus Transmitters

25X1A6a 1. Within the next 60 days the Office of Communications plans to release the facilities at [redacted] that it has been using as a communications transmitter site. This information has previously been discussed with the Real Estate & Construction Division and it is understood that they are preparing to take the necessary action for the proper termination of the Agency's responsibilities of occupancy at this location.

25X1A6a 2. The Engineering Division of the Office of Communications is currently engaged in moving, from the [redacted] site to their new location, the equipment considered of value. There are, however, four transmitters (two Gates type HF-15 and two Press Wireless type PW-981-A) that are obsolete with parts not available and these are excess to current and future requirements of the Office of Communications. Therefore, it is requested that you take the appropriate action for the disposal of these four transmitters.

3. Both the Press Wireless and the Gates transmitters are unclassified since they were of standard commercial manufacture. Additional detailed information on each type transmitter is attached for your use.

25X1A9a 4. It is requested that representatives of your Division contact Mr. [redacted], Chief of the Plant Engineering Branch, OC, if any additional data is necessary for disposal of these four transmitters.

25X1A9a
[redacted]
Executive Officer
